

Netball Learning Integration

Umpire and Coaching accreditations will be captured via the Netball Connect registration process and will automatically populate accreditation levels and expiration dates directly taken from Netball Australia's learning management system.

When registering to a competition, coaches and umpires will be required to enter their Netball Learning Username. This username (which is an email) can be different to the Netball Connect email address you use to register, so it's important you check via www.learning.netball.com.au and enter the correct information.

The Registration process will ask about your Umpire and/or Coaching accreditation. Select either option, as is relevant, enter your Netball Learning Username and complete the registration process.

The Accreditations will be matched with data from Netball Learning and populated in your profile. These are only editable by Netball Queensland staff. Please contact netballconnect@netballq.org.au if required.
